

Clear**Foundation**

Clear**Foundation** charts the course for IT initiatives to meet your strategic goals. Quickly get key people on side, avoid potential pitfalls and optimize from the start.

Meet the demands of digital business, migrate systems to the cloud, rationalize your data centers or outsource some of your IT to a trusted third party. When change is a must, Clear**Foundation** is the quickest, most effective way to get ready.

Clear**Foundation** looks at:

- Facts
- Opinions
- Emotions
- Data

Our clients can then make better decisions for better outcomes.

Clear**Foundation**

Uncover business challenges

Clear**Foundation** uses a proven methodology combining automated data analysis (from Clear**Insight**) and direct interviews with employees at every level. Input is anonymized, allowing people to speak truthfully about their needs and issues, free of workplace politics. With our approach we identify major barriers to your business success and suggest concrete actions you can take.

Link up needs and strategy

The real reasons for change can be lost during large transformation programs, so they aren't as effective or efficient as they could be. Clear**Foundation** draws direct lines between your issues and our recommendations to make you a successful, business-driven organization.

Common ground

By focusing intensely on your business needs, Clear**Foundation** identifies the root problems in an open and blame-free way. We develop a strategy that all stakeholders can support—regardless of their “tribe” – so that everyone can benefit.

Rock-solid experience

Our consultants have spent their careers steering large enterprise IT organizations and know what works, and what doesn't. Clear**Foundation** can underpin multi-year projects, but it also identifies the quick-win opportunities that will immediately make a difference.

Don't let your IT initiatives sink: **build a ClearFoundation**
